PROFESSIONAL SUMMARY

Detail-oriented and skilled Cardiac Technologist with expertise in performing diagnostic cardiac tests including ECGs, stress tests, echocardiograms, and Holter monitoring, as well as assisting in cardiac catheterization lab (cath lab) procedures. Proficient in preparing patients for both non-invasive and invasive cardiovascular diagnostics, operating and maintaining cardiology and specialized imaging equipment (including fluoroscopy) used in cath labs, and ensuring sterile field protocols. Experienced in monitoring patient vital signs, assisting cardiologists during catheter insertions and interventions, and documenting procedure details accurately. Strong patient care skills combined with knowledge of cardiovascular anatomy, physiology, and safety protocols. Certified and trained in cardiovascular technology and catheterization lab procedures, committed to delivering high-quality cardiovascular healthcare support in both diagnostic and interventional settings. Currently working in a Echocardiaphic domain .
